Professional Experience

Casavogue, Montreal, QC, Canada

Odoo ERP Developer and IT Systems Administrator

Nov 2022 – Present

- Lead the development, configuration, deployment, and support of a custom Odoo ERP solution on Odoo.sh.
- Translate sales, purchasing, inventory, accounting, logistics, and operations requirements into ERP workflows and system configurations.
- Build and maintain custom Odoo modules, reports, dashboards, automated actions, and data views.
- Manage staging and production workflows, testing, backups, data quality, and post-go-live enhancements.
- Support users, document workflows, troubleshoot issues, and improve business processes across departments.

Freelance ERP Consultant, Upwork and International Clients

Odoo Consultant / Business Analyst

Dec 2020 – Jul 2025

- Delivered ERP consulting, CRM setup, Monday.com workflows, data management, and automation support for international clients.
- Completed Odoo, CRM, real estate, data entry, market research, and business process projects with strong client feedback.
- Supported client discovery, solution design, module configuration, data cleanup, testing, training, and documentation.
- Worked across retail, manufacturing, real estate, healthcare, ecommerce, and small-business operations.

Sornali Group (Sabir Ltd), Dhaka, Bangladesh

ERP System Analyst and Software Developer

Apr 2016 – Nov 2022

- Designed and supported ERP applications for a multi-entity manufacturing and trading group spanning

- production, inventory, procurement, POS, invoicing, and operational reporting across 5+ business units.
- Migrated legacy operational records into a centralised ERP system, validating 50,000+ product, transaction, and inventory records for accuracy before go-live.
- Mapped and documented 20+ cross-department workflows covering production scheduling, warehouse movement, procurement approvals, and sales order processing.
- Administered user accounts, maintained relational databases, generated management reports, and provided hands-on support to 50+ system users across departments.
- Led UAT cycles with department heads, resolved post-release issues, and produced reference documentation that reduced onboarding time for new users.

Selected Project Highlights

Odoo ERP Full Implementation — Casavogue (2022–Present)

Ground-up Odoo build on Odoo.sh: 10+ modules configured, Python-automated workflows, custom reports and dashboards, and zero critical production failures over 3+ years.

ERP Data Migration — Upwork Client (Manufacturing, North America)

Extracted, cleaned, and transformed 80,000+ legacy records into Odoo using Python ETL scripts and SQL validation queries; reconciliation approved by client finance team before go-live.

Odoo Implementation — TKH AI Technology, Netherlands & Poland (Upwork)

Replaced Jira and Confluence with Odoo: deployed Sales, Invoicing, HR, Timesheets, Helpdesk, Project Management, and a Documentation knowledge base for a two-country tech team.

CRM Consolidation — Upwork Client (Real Estate, USA)

Migrated fragmented deal database into Close CRM and Podio; built pipeline rules and automated follow-ups, reducing duplicate records by 70% and standardising the sales workflow.

Shopify–Odoo Integration — Upwork Client (Ecommerce)

Troubleshoot and resolved product/inventory mapping errors in a Shopify-to-Odoo sync covering listings, stock levels, and order flow; documented integration logic for the client team.
